

# Hide Incomplete Pages

Hiding a page prevents it from being published with the rest of your site

To hide a page:

1. Open the Pages & folders menu

Pages & folders menu

1. Click the More button ( ) for the page you would like to hide
2. Select Edit page settings from the dropdown

[Edit page settings](#)

1. Toggle the Hidden from navigation switch
2. Click Done

Hidden from navigation

Hiding the homepage

It is not possible to hide the homepage. To hide your entire site, take the site offline using Site settings > Site Statuspage.
