

# What Is My Server Name

To locate the server name in cPanel, follow these steps:

1. Log in to your account <https://chi.midphase.com/>
2. Click the cPanel button in the Home tab under the Shared Hosting section.

3. In cPanel find the General Information section in the left or right column. Click Server Information.

\*Depending on the cPanel theme you are using, the account information and Server Information link may look different. Look for a Server Information link in the left or right column. In some cases you may need to select the Statistics tab in the left menu.

4. The Server Information page will show the server name or partial name.
